

CEREC has Tools to Create Tooth Harmony

Smile Design. Matching to natural teeth can be a challenge. CEREC allows opportunities for more control of ceramic shape and texture.

Figure 1. Composite on pegged lateral had discolored, causing the patient to desired a long-term aesthetic solution.

Figure 2. Following laser recontouring and tooth whitening procedures, IPS Empress CAD restorations were designed, milled, and characterized for aesthetic completion.

Figure 3. Customized and characterized CEREC/IPS Empress CAD ceramics.

Figure 4. Notice the harmony of #7 & #10 labial surface profile with adjacent centrals and canines.
