

## CEREC...One Appointment Event

**Figure 1.** A mishaps such as a fractured off crown can be repaired and restored in one appointment.

**Figure 2.** Following endodontics, the restorative process started with a FRC Postec Plus post bonded with Multilink-Primer A/B (opaque) and Voco A2 core material. Final crown preparation demonstrates crown lengthening to establish biological width and maximum tooth core.

**Figure 3.** Laser troughing and Contrast Spray provides an effective environment to optically capture crisp and clean

**Figure 4.** Final restorations (IPS Empress CADA1 HT) designed, finished and seated in one appointment.
